## DYNAMIC METAL RENDERING 2011 Parts & Labor Price Sheet

My statement of ethical responsibility:

*"Unless I am willing to provide good, caring, and honest service to my clients, I have no right to even hope for it from others, let alone expect it"*

### Our Specialty Work Prices are per linear foot or each piece Al = aluminum Cp = copper

type / price	Gutters and Downspouts with our 15 year installation warranty
Al - 4 Cp - 15	for our special continuous K-5 style gutters in aluminum or standard 16oz copper; carefully installed with a grade toward the drain, mounted with our exclusive heavy duty Monster Hidden Hangers placed double Building Code: spaced 2 feet apart with a pair of stainless steel screws in each, better caulk, rust free rivet assembly, and above standard 2"x 3" downspouts with curved elbows attached with special pipe cleats and stainless steel screws \$3 per foot added for heavy duty 20oz copper gutters
<b>Hard Installations</b>	
1.50	added for rafter tail mounting; where there is no fascia boards (to cover the cost of measurements for precise alignment of the hangers and longer stainless steel screws, and the difficulties commonly found)
2.00+	Added for other hard installation, ie: second or third story mounting, tile, wood, or metal roofs, steep roofs, difficult access for ladders, brick or stucco siding and such
<b>Common Preparations (as needed)</b>	
1	for the removal and recycling of old rusty steel gutter parts (most common) on a one story house
1.50	for the removal and disposal of the plastic gutter parts
0.75	for the removal and recycling of aluminum gutter parts
0	for the removal and recycling of copper gutter parts (most rare)
Al - 50 Cp - 60	for extra labor to miter 90 degree corners (50% more for odd angles), mitered end-caps, or the split gutter expansion joints (for lengths over 45 feet)
<b>No-clog Options: for our 15 year no-clog warranty upgrade</b>	
St - 2.50 Cp - 9.50	for leaf-screens over new gutters (note: steel screens w/a black powder bake finish are used, since aluminum screens would be too fragile and stainless steel would be as costly as copper)
Al - 50 Cp - 70	for each leaf-catcher (a strainer for protection of your underground drainage pipes from clogging up placed down low in downspouts for easy access), or double sized no-clog gutter outlets (using a 3"x 4" elbow and a 2"x 3" reducer). Double for installation into an existing gutter systems
<b>Extra Preparation (if needed)</b>	
Some problems may not be anticipated and written on the bid, but I would not proceed without authorization	
Al - 2.50 Cp - 7	for heavy gauge painted aluminum 1"x 3" drip edge add: \$0.75 per foot for removal of the old rusty drip edge
5	for special wood trimming areas, ie: rafter tail cut offs, or enlarge the DS hole in a deck
4	for 5/4" x 6" primed spruce fascia boards installed with Deckmate screws (instead of nails)
Al - 3.50 Cp - 10	for custom sheet metal fascia cover, or for a imitation fascia to cover the rafter tails add \$5 for each custom end and corner
2	for painting to match your trim color (includes the paint)
3.50	per square foot of vinyl or 3/8" primed plywood soffit (vents and painting extra)
50	for successful clearing out a clogged underground rain sewer drainage pipe, so it will flow

**Work will only be scheduled in with receipt of your 1/3 down deposit**

We can get together to finalize the contract, or mail in the deposit if we have worked out the details through e-mail

Mail to: **DMR GUTTERS**, 10432 S. W. 52 Ave., Portland, OR 97219

For our custom copper sheet metal work for other rain management products like 4 to 16 sided roof caps, decorative scuppers, and deluxe chimney caps; see our web site <http://copper-by-design.com> for details and thousands of photos with price examples. E-mail us to go over different options.
